The A. R. McLennan and J. V. Wright well in the northwest corner of section 31-3-3 which is being drilled by Conway & Kiser, has been delayed. A report reached here last night that after reaching a depth of 500 feet the rig had to be skidded.

Active drilling has been resumed in section 11-5-3, south of Joiner City, by the Dundee-Samoset companies. Pete Lively has the contract and the owners are of the opinion now that they will drill a test to a depth of 2,000 feet.

Catarrh being greatly influenced by constitutional conditions requires constitutional treatment. Hall's Catarrh Cure is taken internally and acts through the blood on the mucous surfaces of the system, thereby destroying the foundation of the diseases, giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in the curative powers of Hall's Catarrh Cure that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address: F. J. STUDY EARTH'S CRUST IN ARBUCKLE REGION

Norman, Okla., Nov. 11.—Two hundred students of the state university, under the supervision of geology professors and guides, spent three days in the Arbuckle mountains this week studying the structures of the earth as shown in one of the favorable spots in the United States for such a study. Students making the trip were only those in the geology department.

many of whom are preparing themselves to aid in the wonderful geological development not only of the United States but of the entire world. At the spot they visit each year, a shell of the earth's crust, two miles thick, has been thrust up edgewise in ages past, permitting the student to examine the different mineral bearing layers of the earth merely by walking along the surface.
